## GOVERNMENT OF INDIA.

## DEPARTMENT OF REVENUE AND AGRICULTURE.

**Rainfall summary for the seven days ending at 8 hrs. on Thursday, the 5th June 1913, based on the Indian Daily Weather Reports of the period.**

1. The monsoon in the Arabian Sea gave rain in the west of the Peninsula especially in Malabar, but failed to penetrate far inland. A feeble disturbance from the Bay crossed the Orissa coast at the close of the week, and was accompanied by a fairly strong inrush of monsoon winds which gave heavy rain in south Bengal and Orissa.

Rain fell daily in Burma and Bengal and was of frequent occurrence in Bihar and Orissa; but, except on the 29th and 30th, very little occurred in Assam. Some rain fell in the United Provinces, chiefly in the eastern and hill districts, and local showers were reported from other parts of the country.

2. *Burma.*—Rainfall was nearly general in Lower Burma on the 31st May, and in Upper Burma on the 1st and 2nd June.

*Northeast India, including Orissa.*—Nearly general rain fell in Assam on the 29th and 30th, in Bengal on the 3rd and 4th, and in Bihar and Orissa on the 30th.

*The United Provinces, Central India and the Central Provinces.*—On the 30th rainfall was nearly general in the east of the United Provinces and fairly general in the west. Nagpur, Amraoti, Chanda and Jagdalpur were the only stations that had any rain in the rest of the division.

*Northwest India.*—Rain fell at Simla, Sialkot, Rajkot and Surat.

*The Peninsula.*—Rainfall was nearly general on the Malabar coast on most days of the week, in the Konkan and the south of the Bombay Deccan on the 29th and 31st May, and 4th June, and in Mysore on the 31st May and 4th June. Rainfall more or less local in character occurred in Hyderabad, southeast Madras and on the north Madras coast.

It was within 20 per cent of the normal in the Punjab East and North, Hyderabad North and the Madras Deccan; and was 20 per cent or more in defect in all the remaining divisions, except Baluchistan and Sind where the absence of rainfall is a normal feature at this time of year.

The seasonal rainfall up to date is 20 per cent or more in defect in the Bay Islands, Burma, the Punjab Southwest, Kashmir, the North-West Frontier Province, Baluchistan, the Konkan and Mysore. It is within 20 per cent of the normal in Sind, Berar, the Central Provinces East, Malabar, Madras Southeast, the Madras Deccan and the Madras Coast North, but is 20 per cent or more in excess in the rest of the country.

**Assam.**—Heavy rain fell in the Surma Valley and the neighbouring hills and in Kamrup and Lakhimpur. The fall was moderate elsewhere. More rain is still wanted in the Mangaldai subdivision. Floods have caused some damage to rice in Goalpara and in parts of Kamrup and Lakhimpur but the weather is generally favourable. Sowing and transplantation of early and late rice, plucking of tea and planting of sugarcane are in progress. Prospects of tea are fair. The average price of common rice has risen by 2 per cent. Cattle disease is reported from six districts.

The falls were heaviest in the North Central, Central Submontane, South Oudh and South Eastern Submontane districts, in the Almora, Bareilly, Aligarh and Farrukhabad districts and in the Rampur State. **Rainfall summary for the seven days ending at 8 hrs. on Thursday, the 12th June 1913, based on the Indian Daily Weather Reports of the period.**

The area of low pressure which accompanied the advance of monsoon winds in the Arabian Sea entered Kathiawar on the 9th. Its disappearance from the sea permitted a freer advance of monsoon winds into the interior of the country, and rainfall due to the Arabian Sea current extended into Gujarat, Rajputana, the Punjab, the North-West Frontier Province, the Central Provinces and Central India. The Bay current was active in Burma and northeast India, but towards the close of the week a depression began to form in the Bay and caused a temporary diminution of rainfall in Bengal. The rainfall of the week was unusually heavy, especially in the east and north Punjab and Gujarat, and in only a few divisions was it below the average.

2. *Burma.*—Rain fell daily. In Upper Burma it was nearly general on the 7th, 8th and 11th, and in Lower Burma on the 8th, 9th, 10th and 11th.

*Northeast India, including Orissa.*—Nearly general rain fell in Assam on the 6th and 10th, in Bengal on the 7th, 8th and 11th, and in Bihar and Orissa on the 5th, 9th and 11th.

*The United Provinces, Central India and the Central Provinces.*—Rainfall occurred in all parts of the Central Provinces and Central India and was nearly general on the 10th. In the United Provinces it occurred chiefly in the northwestern districts where some heavy falls were registered.

*Northwest India.*—Baluchistan, Sind and west Rajputana were practically rainless. Nearly general rain fell in the Punjab on the 9th and 11th, in east Rajputana on the 11th and in Gujarat on the 9th and 10th.

*The Peninsula.*—Rainfall was nearly general throughout the week on the west coast, on the 5th and 6th in the Bombay Deccan, on the 5th, 6th and 10th in north Hyderabad, and on the 5th and 10th in Mysore.

MEMORANDUM ON THE METEOROLOGICAL CONDITIONS  
PREVAILING BEFORE THE ADVANCE OF THE  
SOUTHWEST MONSOON OF 1913.

---

Monsoon rainfall in India is affected by previous conditions over various parts of the earth. The recent data of those which appear to be of importance are :—

## THE ARGENTINE REPUBLIC.

2. At Buenos Aires monthly pressure was in excess by '03" in March and in defect by '09" in April, and '03" in May.

## CHILE.

3. At Santiago monthly pressure was in excess in March and April by '02" and in defect in May by '01".

## THE PACIFIC OCEAN.

4. At Honolulu pressure during May was normal.

## AUSTRALIA.

5. Pressure was in excess in April by '02" and in May by '07".

## THE INDIAN OCEAN.

6. (a) *Mauritius*.—During May pressure was persistently below the normal. The defect amounted to '05" during the last week and to '02" on the mean of the whole month. Winds were somewhat stronger and more easterly than usual, while rainfall was about 30 per cent. short of the average.

(b) *Zanzibar*.—Pressure was practically normal in April and about '04" in defect in May. Winds were slightly more westerly than usual and below normal in intensity in May. Rainfall was 27 per cent. in excess in April but was 10 per cent. in defect in May.

(c) *Seychelles*.—Pressure was low by '07" in April and '01" in May. Winds were above their normal strength and more easterly than usual during the last three weeks of May. Rainfall during May was in defect by 3" or 50 per cent.

(d) *Logs of vessels*.—The available information indicates that over the west of the equatorial belt the southern trades appeared before their normal date and were on the whole stronger than usual. Over the central portion of the belt on the other hand the northward extension of the southeast wind was much retarded. There is also some evidence that over the greater part of the western half of the belt there was more rain and the weather was more squally than is generally the case in May.

Over the Indian seas and particularly over the Bay of Bengal the weather was unusually quiet during May.

## AFRICA.

7. *German East Africa*.—Rainfall was greatly above the normal in April, but deficient in May.

*Uganda Protectorate.*—Rainfall was in slight excess both in April and May.

*Northeast Africa.*—The floods of the Nile are mainly due to rainfall in Abyssinia, and the variations of this are fairly closely related with those of the monsoon in northwest India. During April rainfall was well above the average in Abyssinia and the gauges in the Sudan began to rise a fortnight before the normal date. The rise was brisk about the middle of May, but thereafter the river fell and was below the normal level on the 1st June.

Pressure was low during the first three weeks of May and very high during the last week. Temperature in Egypt was persistently lower than usual.

#### SNOWFALL.

(a) The snowfall of the past winter is said to have been abundant in Transcaspia, Turkistan, northeast Persia and northwest Afghanistan.

(b) Over west and north Persia the winter was on the whole milder than usual, and there was no prolongation of the winter conditions.

(c) In Baluchistan the precipitation was well above the average in December, February and March and lighter than usual in November, January, April and May.

(d) In Kabul and the surrounding hills there was considerably more than the normal amount of snowfall in November, December and probably also in January. No information is forthcoming for the succeeding months.

(e) The snowfall in the mountains of the North-West Frontier Province was, according to the available information, considerably heavier than usual in February and below the normal during the rest of the winter, but particularly in April and May. The accumulations were disappearing fast.

(f) In Kashmir the precipitation was either normal or in defect throughout the winter except in April when it was in marked excess. Unusually heavy snow is reported to have fallen in April in and around Leh.

(g) The snowfall in the western Himalayas was much in excess of the normal generally in February and locally in March and April. There was no general heavy fall in May, although in the Chamba hills snow is said to have fallen as low as 11,000 feet on the 20th and thus caused a delay of at least fifteen days in the opening of the passes.

(h) Judging by the few reports received the snowfall in the eastern Himalayas was in excess locally.

On the whole it appears that in the mountain zone bordering upper India the winter was by no means severe, the snowfall during the greater part of the period having been below the normal. There has been no marked prolongation of the winter conditions, although excessive snow appears to have fallen in April in parts of Kashmir. In Transcaspia, Turkistan, northeast Persia and parts of Afghanistan there has probably been more than the average amount of snowfall.

(i) With regard to the accumulations of snow at the present time very little information is available. On the snowy ranges to the north of Simla the accumulations appear to be almost the same as at the corresponding date last year, but they are decidedly less than in 1911.

#### INDIA.

9. During May there was appreciably less rainfall in the Andamans, Burma and on the Malabar coast; but a spell of abnormally rainy weather occurred over northern and central India during the third week due to a very peculiar distribution of pressure. The rainfall was associated with a marked depression of temperature. So far as can be ascertained there was no important snowfall during this disturbed period. This impression is confirmed

by the fact that when rainfall ceased a rapid return to normal temperature conditions occurred.

On the mean of the whole of May temperature over northwest India agreed closely with the normal; thus there was no indication of the presence of any marked abnormal snowfall.

#### INFERENCES FROM THE DATA.

10. (a) The distribution of pressure is most favourable to the Indian monsoon when pressure is high in March, April and May in Argentina and Chili and low in May in the Indian Ocean. In the present year conditions were slightly favourable in March, but in April they were distinctly unfavourable for pressure was very low in Argentina though nearly normal in Chili. In May pressure conditions were practically neutral; conditions were slightly unfavourable in Argentina and Australia, but were slightly favourable at Mauritius, Zanzibar and Seychelles. On the whole the general pressure conditions appear slightly unfavourable.

(b) The inferences to be drawn from the winds and rainfall in the Indian Ocean during the past two months do not affect the monsoon prospects very strongly. In April there was abnormally heavy rain and squally weather in the west of the equatorial belt and the adjacent African areas which suggested distinct feebleness in the subsequent monsoon, but in May conditions were largely reversed and there was less rain than usual at Seychelles, Zanzibar and in German East Africa.

(c) The effect of snowfall has next to be considered. The accumulations now lying on the hills are probably normal; so that northwest India should have its normal share of the rainfall of the country and there should be no unfavourable influence on the strength of the monsoon over India as a whole.

(d) One further factor should be considered. There appears to be good evidence, although no explanation is forthcoming, that there is a tendency for years of which the average pressure over India is high to be associated with a good monsoon in the succeeding year and *vice versa*. Now in 1912 pressure was in moderate excess and the tendency just referred to therefore affords a justification for adopting a slightly more hopeful attitude than would otherwise be the case.

(e) The general impression left is that the unfavourable and the favourable factors cancel one another.

#### SUMMARY.

11. The indications are not sufficiently decided to justify a forecast that the total monsoon rainfall of India will be in excess or defect. All that can be inferred is that a large excess or large defect is unlikely.

There is no ground for anticipating that accumulations of snowfall will exert a prejudicial influence on rainfall in northwest India.

Season and Crop Prospects for the week ending Saturday,  
7th June 1913.

**Burma.**—Moderate rain fell over the whole Province. Ploughing for winter rice and for upland crops is proceeding normally. Cattle are in good condition. The price of unhusked rice remains steady though a little above normal.

**Assam.**—Heavy rain fell in the Surma Valley and the adjoining hills. Elsewhere the fall was slight to moderate. Sowing and transplanting of early and late rice, plucking of tea and planting of sugarcane are in progress. Prospects of tea are fair. Jute is reported to have been damaged to some extent by insects and hailstorms in the Goalpara district. The average price of common rice has risen by 1 per cent. Cattle disease is reported from eight districts.

**Bengal.**—There was heavy rain during the week except in places in the Rajshahi division. Agricultural operations have almost been stopped and some damage to standing crops is reported. The average price of common rice for the Province has risen slightly as compared with that of the previous week. Agricultural loans are being distributed in the Chittagong Hill Tracts. **Rainfall summary for the seven days ending at 8 hrs. on Thursday, the 19th June 1913, based on the Indian Daily Weather Reports of the period.**

The depression forming at the head of the Bay at the close of the previous week crossed the Bengal coast on the 12th and advanced to the Sikkim Himalayas, giving some heavy rain in east and north Bengal. Eighteen and a half inches fell at Darjiling during the four days ending at 8 hours on the 18th. With the disappearance of the depression rainfall decreased in northeast India, and winds became light and unsteady on the Bengal and Orissa coasts. The Arabian Sea monsoon current was giving rain over a large extent of country at the beginning of the week, but there was a marked decrease in its activity on the 14th, and during the remaining days the rainfall given by it occurred chiefly on the west coast of the Peninsula.

2. *Burma*.—Rainfall was nearly general on most days in Lower Burma and local in Upper Burma.

*Northeast India, including Orissa*.—Widespread rain fell during the first five days of the week in Assam and Bengal, in Bihar on the 13th, 14th and 15th, in Chota Nagpur on the 13th, 14th and 18th, and in Orissa on the 12th and 13th.

*The United Provinces, Central India and the Central Provinces*.—Rainfall was nearly general in Central India East on the 12th and 13th, in Central India West on the 18th, and in the Central Provinces on the 13th. It was more or less local in character in the United Provinces.

*Northwest India*.—Local falls of rain occurred in Kashmir, the Punjab, Rajputana, the extreme northeast of Baluchistan and southeast Gujarat.

*The Peninsula*.—Nearly general but light rain was of daily occurrence on the west coast south of Bombay, and rainfall was nearly general in the Bombay Deccan on the 12th. Only a few scattered falls were reported from the rest of the Peninsula.

Season and Crop Prospects for the week ending Saturday,  
14th June 1913.

**Burma.**—The week has been wet outside the dry zone where the rain was light. Ploughing for winter rice and upland crops is proceeding normally. Cattle are healthy. The price of unhusked rice is stationary though a little above normal.

**Assam.**—The weather was seasonable with occasional heavy rain which was locally and generally favourable to standing crops and for cultivation. Some damage has been caused to standing crops by heavy rain in Sylhet. Transplantation of early and late rice, plucking and manufacture of tea and planting of sugarcane are in progress. Harvesting of early rice has commenced in Kamrup and Sibsagar. Prospects of tea are good. The average price of common rice is stationary. Cattle disease is reported from six districts.

**Bengal.**—During the week heavy rain fell generally all over the Province except in some places in the Burdwan and Rajshahi divisions. Standing crops on low lands have been damaged to a certain extent by the excessive rainfall in the western districts and also in Darjeeling, Faridpur, Tippera and Noakhali. The average price of common rice for the Province has risen slightly as compared with that of the previous week. Agricultural loans are being distributed in the Chittagong Hill Tracts. Scarcity of fodder is still reported from parts of Jessore, Midnapore and Noakhali. Cattle disease is reported from six districts.

**Bihar and Orissa.**—The rainfall was general over the Province, the fall being heavy in Bihar and Chota Nagpur and generally moderate in Orissa. Preparation of lands and sowing of autumn crops continue but these operations were temporarily retarded on low lands in parts of the Bhagalpur and Orissa divisions on account of the heavy rain. Sugarcane, jute and other standing crops are doing well. The price of common rice has risen in Bihar, fallen in Chota Nagpur and remained stationary in Orissa. The condition of cattle is on the whole good but cases of cattle disease are reported from twelve districts. The supply of fodder is sufficient throughout the Province. Agricultural operations in the Feudatory States of Orissa are going on satisfactorily.

**United Provinces.**—Heavy rain fell throughout the Provinces except in the Muzaffarnagar, Muttra, Agra, Mainpuri and Barabanki districts and in the Tehri State where the amounts received were less than 1 inch. The rain has damaged standing crops slightly in Aligarh and Jaunpur. Preparation and manuring of fields for autumn crops still continue and sowings are in full swing. In the Benares State the number of persons on relief works has fallen to 1,518 and 163 persons are in receipt of gratuitous relief. Cattle disease is still severe in Bundelkhand but appears to be on the decrease elsewhere. Fodder and water are sufficient. Prices show a slight upward tendency.

**Punjab.**—Moderate to good rain was general. Harvesting and threshing of spring crops continue. Grain and straw on threshing floors have been damaged by rain in some districts. The outturn on irrigated lands is average to good and on unirrigated lands below average. Extra spring crops are being reaped in some districts. Sowings of cotton, sugarcane, fodder and other autumn crops continue. The area sown with cotton, sugarcane and fodder is normal. Cattle are generally healthy and fodder is sufficient except in a few tracts. Prices remain high.

**North-West Frontier Province.**—The week was cloudy and rain fell in various places throughout the Province. The weather is cool in Peshawar and hot elsewhere. The condition of crops is average on irrigated areas. Their condition is bad on unirrigated areas in Peshawar and average elsewhere. Wheat and barley have been threshed and stacked. Their outturn is normal. Autumn crops are being sown. The condition of cattle is generally good. Water and fodder are procurable except in Nowshera where fodder is insufficient and in Dera Ismail Khan where fodder is dear. The water supply is also reported to be scarce in certain *daman* villages in Dera Ismail Khan. Irrigation from the Paharpur canal continues. Prices of wheat and barley are rising in Peshawar and stationary elsewhere. The public health is good except in certain villages of Dera Ismail Khan.

## TARIFF VALUATION OF SUGAR.

The following statement shows in respect of each of the descriptions of sugar distinguished in the Tariff Schedule IV (excepting molasses and all other kinds of sugar), *firstly*, the total imports into India in the month of May, 1913, and the average value per cwt. as calculated on the returns received from the Customs Houses; and, *secondly*, a running total showing the total imports into India since the beginning of the year (1st October to 30th September), and the average net value per cwt. so far established. It is published in conformity with the procedure laid down in Customs Circular No. V of 1911 in order to enable merchants to compute the probable rate of duty for the year 1914:—

**Rainfall summary for the seven days ending at 8 hrs. on Thursday, the 26th June 1913, based on the Indian Daily Weather Reports of the period.**

1. Both monsoon currents were very weak on the 19th and 20th and only scattered falls of rain were reported, but on the 21st although there had been no strengthening of the currents as indicated by the winds and state of the sea, a large increase of rainfall occurred in the northern half of the Peninsula, apparently due to the influence of a very shallow depression which crossed the coast from the Bay without forming into a storm. The depression filled up immediately, but the improvement in the rainfall continued, and monsoon conditions reappeared on the west coast. Rainfall spread into Gujarat, Bihar and the United Provinces, and at the end of the week rain was falling over the greater part of the country.

2. *Burma*.—Fairly general rain fell throughout the week in Lower Burma and on the 23rd and 25th in Upper Burma.

*Northeast India, including Orissa*.—Rainfall was on most days light and local. On the 25th it was fairly general throughout the division, except in Assam.

*The United Provinces, Central India and the Central Provinces*.—Rainfall was of almost daily occurrence in Central India West and the Central Provinces, but in the United Provinces it occurred chiefly on the 24th and 25th.

*Northwest India*.—Fairly general rain fell in the east and north Punjab on the 25th, and in east Gujarat from the 22nd to the 25th. Local falls of rain occurred in east Rajputana and Baluchistan.

*The Peninsula*.—Mysore, southeast Madras and the Madras Deccan were practically rainless. Nearly general rain fell on the west coast from the 22nd, in Hyderabad on the 21st and 22nd, and in the Bombay Deccan on the 22nd and 23rd.

3. The chief daily amounts of rain were as follows:—
